

SDE 1 | Frontend engineer with 5 years of experience building scalable SaaS platforms and high-performance web applications used by tens of thousands of users. Specialized in React, Next.js (SSR/SSG/ISR), TypeScript, and real-time systems. Proven track record of improving performance (40%+ faster loads), supporting 10,000+ concurrent users, and delivering reusable component architectures. Experienced in leading teams, optimizing UX, and collaborating across product, design, and backend teams.

Work Experience

SDE 1 | Frontend Developer
Easywebinar team

Softobiz
Hyderabad, India

Mar 2023–Present

- Improved application performance by **15–40%** through code splitting, lazy loading, memoization, and advanced caching strategies across React and Next.js apps
- Implemented **SSR, SSG, and ISR** in Next.js, achieving up to **40% faster initial page loads** and improved SEO rankings
- Designed and built a reusable **component library using Storybook**, reducing development time by 30% and ensuring UI consistency across 5+ enterprise applications
- Built and scaled SaaS platforms, CRMs, and real-time chat applications with WebSocket integrations using PubNub, handling 10,000+ concurrent users
- Led a team of 4 frontend developers, conducting code reviews and mentoring on best practices, reducing production bugs by 25%
- Collaborated with cross-functional teams using Git workflows, Azure DevOps, AWS S3, and Figma for seamless design-to-development handoffs

UI/UX / Frontend Developer
Designer/Development team

Softobiz
Mohali, India

Mar 2021–2023

- Designed and developed intuitive user interfaces for SaaS platforms, CRMs, and real-time applications serving 50,000+ monthly active users
- Translated Figma prototypes into responsive, pixel-perfect web applications with 98%+ design accuracy using React.js and modern CSS frameworks
- Optimized web application performance using Lighthouse and GTMetrix, achieving average scores of 90+ across performance, accessibility, and SEO metrics
- Built reusable UI systems with Material UI, Chakra UI, Tailwind, and Semantic UI, reducing development time by 40%
- Applied UX principles to enhance interface usability and overall user experience.
- Integrated RESTful APIs and efficiently managed complex state using Redux Toolkit and React Query for dynamic, data-heavy applications.

Technologies and Languages

- Languages & Core:** JavaScript, TypeScript, HTML5, CSS3, SCSS, jQuery
- Frontend & Frameworks:** React.js, Next.js (SSR, SSG, ISR), Redux Toolkit, React Query, Vue.js, Angular.js | Material UI, Chakra UI, Tailwind CSS, Bootstrap, Storybook.js, GrapesJS
- Tools & DevOps:** Git/GitHub, Azure DevOps, AWS S3, Figma, Lighthouse, GTMetrix, Contentful CMS, WordPress, Vercel
- Design & AI:** Figma, GSAP, Framer Motion, Usability Testing, WCAG | Cursor AI, ChatGPT, Lovable, Bolt, Prompt Engineering
- Others:** PubNub| Node.js, MongoDB, RESTful APIs

Selected Projects

EasyWebinar (Webinar Platform) - app.easywebinar.com

Tech Stack: React.js, Next.js, Storybook.js, PubNub, Websocket, Redux, Tailwind, Angular Material

- Currently developing AI module for automating the processes for this million-dollar webinar platform with 100,000+ registered users across multiple vertical products,
- Handled end to end UI/UX + Implemented Storybook.js for component documentation and testing, improving team collaboration and reducing onboarding time by 50%
- Integrated PubNub for real-time features including live chat, polls, QA, Live transcriptions and attendee engagement tools with 99.9% uptime
- Optimized video streaming performance and conducted extensive user research to enhance UI/UX, resulting in 20% increase in user engagement

EasyWebinar (marketing website) - easywebinar.com

Tech Stack: React.js, Next.js, Redux, Tailwind UI, SCSS, WordPress, Figma

- Led full website development using Next.js / variant of this via WordPress, optimizing for performance and SEO. Collaborated closely with **marketing** and **design teams** to create a responsive, conversion-focused UI. Managed ongoing SEO to enhance site visibility and drive traffic.

Catalyst Referrer (Professional Networking Platform)

Tech Stack: Next.js, Redux RTK, Axios, Material UI, TypeScript

- Developed a hybrid platform combining LinkedIn's networking capabilities with Naukri.com's job referral system
- Implemented robust state management using Redux Toolkit, handling complex user profiles, connections, and job matching algorithms
- Built an intuitive user interface with advanced search filters, real-time notifications, and seamless navigation, enhancing overall user experience.
- Optimized SEO using Next.js SSR/SSG, improving site visibility and performance metrics

Blabber (Real-time Chat Application)

Tech Stack: React.js, Rtk, Material UI, SCSS, PubNub

- Designed and developed real-time chat application with modern, intuitive UI supporting text, media sharing, and video calling
- Integrated PubNub with accessible UI patterns compliant with WCAG 2.1 standards
- Implemented responsive design ensuring seamless experience across mobile, tablet, and desktop devices
- Built with focus on performance optimization, achieving <100ms message delivery latency

TheBlackList (newsletter app) - theblacklist.xyz

Tech: Figma, Vue.js, vuetify etc.

Designed and developed a mobile news application with a sleek and intuitive user interface, focusing on delivering a seamless reading experience.

Education

- **BCA** — DAV College, India (2017 – 2020)

Certifications

- **React** — The Complete Guide

- The Complete JavaScript Course
- Advanced CSS and Sass
- Prompt Engineering & Generative AI Workshop

Awards and Recognition

- **“Relentless Learner, Frontend Force”** by [EasyWebinar](#), [Softobiz](#).
- **Spot Award** — Outstanding Contribution to Project Delivery
- **Activities:** NCC (Army & Air Force Wings), NSS Volunteer
